

Green and Circular Economy

Job search
resources

Ajuntament de
Barcelona

Barcelona
Activa

Table of contents

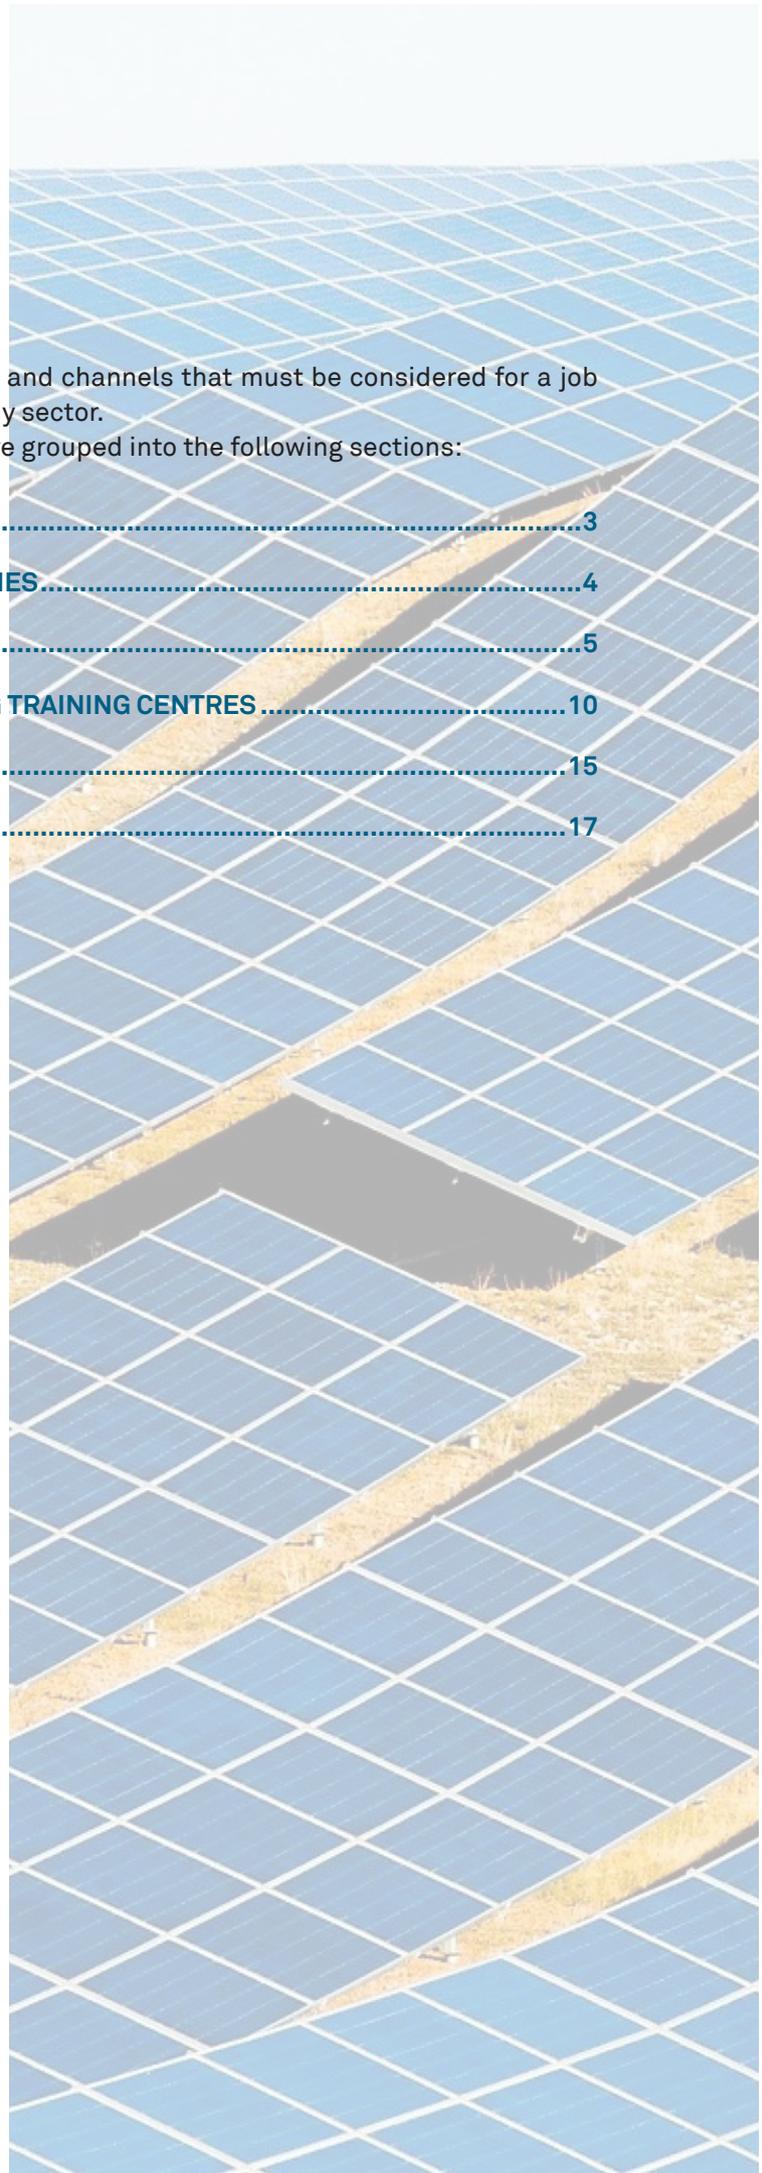

This document aims to relate the main resources and channels that must be considered for a job search focused on the Green and Circular Economy sector.

The main resources and channels of this sector are grouped into the following sections:

01. SPECIALISED EMPLOYMENT WEBSITES	3
02. RECRUITMENT AND INTERMEDIARY COMPANIES	4
03. SELF-APPLICATION	5
04. PROFESSIONAL ASSOCIATIONS AND LEADING TRAINING CENTRES	10
05. NETWORKING.....	15
06. CONFERENCES AND EVENTS	17

DID YOU KNOW THAT...

Specialised employment websites unite job offers from a specific profession or sector. They are a useful tool both for companies, who need to recruit increasingly **specialised talent**, and for job searchers who want to find offers more focused on their areas of interest.

These websites usually have a reduced number of jobs on offer, but they are more aligned with your professional profile and you will find **less competition**.

REMEMBER

You will also find specific offers in general employment websites filtering by **keyword**, such as “**renewable energy**”, “**waste management**”, “**environment**” and others related to your occupation.

FOCUSING

Renewable energy contributed with **12.54 billion euros** to the Spanish GDP in 2019, amounting to more than **1%** of the Spanish economy, and there were over **95,000 jobs** in this field.

01. Specialised employment websites

Ciencias ambientales

<https://www.cienciasambientales.com/es/trabajar-en-medio-ambiente/>

This employment website gives access to environmental job offers sorted by public and private sector. It also displays information such as publications, regulations, specialised trainings and employment guides of the sector.

Ecoempleo

<http://www.ecoempleo.com/?pag=of>

This website displays jobs related to the environmental sector. It also offers a guide of green employment, which includes a list of job roles linked to the environment in different sectors.

Energías renovables

https://www.energias-renovables.com/Ofertas_de_empleo

This website includes a career site, news, articles and recommendations.

Energy Jobs

<https://energyjobsnetwork.com/>

Career site in English to search for international jobs in the field of energy.

Portal de Empleo en Medio Ambiente

<http://www.empleomedioambiente.com/>

This website provides access to job offers related to Green and Circular Economy, as well as an environmental news section.

Trabaja en Medio Ambiente

https://www.trabajaenmedioambiente.com/bolsa-de-trabajo/?search_location=&search_category=206

Career site that provides access to jobs related to this sector. The offers can be filtered by field of study or specialisation.

DID YOU KNOW THAT...

These companies aim to **select a candidate** to cover for a specific role for the customer company.

Therefore, temporary recruitment agencies, head-hunters and service companies become a **key channel** to access certain offers and companies in the sector.

Besides, they manage several job offers at the same time, so by applying through these companies you will have access to **offers from different clients**.

REMEMBER!

It is a common requirement in many job offers of this sector to have experience and **knowledge in environmental regulations, as well as additional training** in this field.

FOCUSING

The most **in-demand occupations** in this sector are the following: **waste residue flow managers, eco product designers, and environmental educators**.

02. Recruitment and intermediary companies

Abcon executive search

<https://abconrh.es/archives/category/nacionales>

Abcon is a company specialised in searching and recruiting qualified staff for companies in this sector, particularly those related to renewable energy (solar, wind and biomass energy).

Amphos 21

<https://www.amphos21.com/trabaja-con-nosotros/>

International scientific and technical consulting company in the environmental field. It displays job vacancies in Spain, Chile and Peru.

Binternacional

<https://binternacional.net/seleccion-de-personal-energia/>

International recruitment company bringing talent to companies in different areas, such as energy and packaging.

Michael Page Medio Ambiente & Energía

<https://www.michaelpage.es/seleccion-personal/medio-ambiente>

General recruitment company that allows to filter offers in the fields of environment and renewable energy.

Novotec

<https://www.novotec.es/global/es/careers>

Environmental consultant offering comprehensive solutions in different areas of knowledge linked to the environment, sustainability, prevention, industrial and environmental engineering, and project management. Novotec belongs to Applus+ Group and their website includes job offers in the fields of energy and industry in Spain, Costa Rica and Portugal.

Robert Walters

<https://www.robertwalters.es/energia.html>

Human resources strategy consultancy with a specific and personalised career site for energy jobs.

DID YOU KNOW THAT...

Self-applying to a company before they post a job offer is a good way to **anticipate their demand for personnel** and show interest in joining their team.

For your self-application to succeed, you will need to **send a cover letter alongside your CV** and follow up on your application. Immediate results are not guaranteed, but you might be selected for unpublished offers and **reduce competition to a minimum.**

REMEMBER!

Being environmentally aware and interested in sustainability and energy efficiency are some of the most required **specific skills** in this sector. If you have them, **make them stand out in your self-application!**

FOCUSING

Barcelona has a long history in Green and Circular Economy, as shown by initiatives such as the promotion of **Ecoparks** for municipal solid waste treatment and the creation of a **low emissions zone (ZBE)** with the aim to reduce CO₂ emissions.

03. Self-application

A) COMPANIES

Companies in the renewable energy and energy efficiency sectors:

Acciona

<https://www.acciona.com/es/nuestro-proposito/trabaja-con-nosotros/ofertas-empleo/>

Company dedicated to developing sustainable solutions in infrastructures, specifically in renewable energy. Their website has a section offering job hunting tips.

Aigües de Barcelona

<https://www.aiguesdebarcelona.cat/web/ab-corporativa/ocupacio>

Public company that deals with water cycle management. There is a section on their website to join their team.

Aqua Ambient Ibérica

<https://aqua-ambient.com/contacto/>

Company specialised in wastewater treatment, particularly hydro-carbonated water treatment. Candidates may self-apply through their contact form.

Aqua Química

<https://aquaquimica.net/tecnologia-agua/>

Aqua Química offers water treatment and control services. Candidates may self-apply through the contact form on their website.

Endesa

<https://www.endesa.com/es/talento/ofertas-de-empleo?category=spain%7C>

Company in the electric power sector offering international job vacancies.

Enertika

<https://www.enertika.com/ca/treballar-enertika/>

Independent operator of distributed energy looking for commercial agents and collaborators to strengthen their service commercial structure. They take self-applications via e-mail or through a contact form available on their website.

EPD Energia

https://jobs.edp.com/?locale=es_ES

International energy group present in 14 countries. In Spain, EDP generates, distributes and commercialises electricity, gas, renewable energy and other services. Their website has a job search engine that allows candidates to filter vacancies by category.

Fluidra

<https://www.fluidra.com/es/empleo>

Group of companies related to water treatment and swimming pools.

Gesternova

<https://gesternova.com/>

100% renewable electricity supplier, also representing other renewable electricity producers in the market. They accept self-applications via email.

Iberdrola

https://www.careers.iberdrola.com/?locale=es_ES

Multinational company that has a job search engine to search for vacancies in the different countries where they operate. Candidates may also register on the website to send their self-applications to the several companies in the group.

Naturgy

<https://trabajaconnaturgy.aplygo.com/leadtalent/index.html>

Multinational business group dedicated to integrating gas and electricity. They have a specific internship programme.

Solarig

<https://solarig.com/trabaja-con-nosotros/>

Company in the solar photovoltaic industry developing, building and operating solar plants worldwide.

Som Energia

<https://blog.somenergia.coop/som-energia/ofertas-de-trabajo/>

Non-profit green energy cooperative focused on commercialising and producing renewable energy amongst other activities.

Suez

<https://hris-suez.csod.com/ux/ats/careersite/10/home/?c=hris-suez&country=es>

Strategy consultant operating in different EU territories. They offer solutions related to circular economy, natural resources and their management models.

Urbaser

<https://www.urbaser.com/>

Company dedicated to environmental management, urban services operation, waste treatment and water treatment. They are present in 30 countries.

Environmental management and control companies:

Aecom

<https://aecom.com/careers/>

International consulting company dedicated to engineering, construction and technical solutions. They also specialise in environmental services.

Anthesis Lavola

<https://www.thesisgroup.com/ca/talent/buscar/>

Consultancy based in Barcelona and Manlleu offering solutions in several areas, such as sustainable development, urban and territorial sustainability, education for sustainability and climate change.

Applus+

<https://www.applus.com/global/es/careers/work-with-us/job-opportunities>

Company providing testing, certifications, technological services and technical assistance in environmental prevention. They have a department focused on energy and industry.

Asecorp

<https://www.asecorp-online.com/pagina.php?idP=7>

Consultancy specialised in optimising and ensuring the compliance with environmental regulations, health and safety in the workplace and industrial safety. They have a specific site to receive self-applications from candidates with a technical background.

ATJ consultores

<https://atjconsultores.com/ingenieros-de-obras-publicas/>

Engineering and architecture consultancy offering waste cleaning and treatment services as well as water treatment services. Candidates may contact their HR department through the contact form on their website.

Bioquat

<https://www.bioquat.com/ca/vols-treballar-amb-nosaltres/>

Energy and environmental consultancy offering solutions mainly in the fields of efficiency, management and engineering.

Centre de Gestió Mediambiental - CGM

<https://ecocgm.com/localitzacio-contacte/>

Company offering environmental services and comprehensive waste treatment services to public and private companies.

Cinergia

<https://www.cinergia.coop/cinergia-company-team/>

Company dedicated to the conception, design and production of customised power electronics solutions. Candidates may contact the company through the contact form on their website.

Grup Tersa

<https://www.tersa.cat/ca-es/contacte/>

Public company operating in the Barcelona metropolitan area. They specialise in managing environmental services related to circular economy, specifically to the selection, treatment and control of municipal solid waste.

Ros roca

https://sigma9.rosroca.net/persones/solicitudes/curriculum_es_pas1.php

Company dedicated to manufacturing equipment and designing and developing engineering systems applied to waste collection. There is a specific form on their website through which candidates may send their self-application and attach all the required documents.

SGS

<https://www.sgs.es/es-es/our-company/careers/careers-at-sgs>

Spanish company with headquarters in Barcelona offering consulting services in the fields of environment and workplace health and safety. Their website lists all available job offers filtered by geographical area and department.

Soluciones Mediambientals Assessors - SMA

<https://smambientals.com/contacte/>

Consultancy company dedicated to engineering projects, licences, legalisations, technical certificates, treatment systems, recovery projects, comprehensive waste management and environmental advice and control.

Tradebe

<https://www.tradebe.com/work-us>

International company offering environmental services. They have several centres in the Barcelona province.

B) SPECIFIC DIRECTORIES:

Ambientum

<https://www.ambientum.com/directorio-de-empresas>

Website offering a directory of companies in this sector as well as information about specialised training, amongst other services.

APPA renovables

<https://www.appa.es/>

The association of renewable energy companies (APPA) groups together businesses and organisations that share the same goal - making use of renewable energy from all sources. Their website gathers relevant data in reports, offers legal documents, press releases and articles, and includes a compilation of news related to renewable energy.

Directori de les consultories i les enginyeries mediambientals

http://mediambient.gencat.cat/ca/05_ambits_dactuacio/empresa_i_produccio_sostenible/economia_verda/catalunya_circular/suport-empresa/iniciat-economia-circular/directori-de-les-consultories-i-les-enginyeries-ambientals/

Directory of Catalan companies specialised in environmental consulting and engineering.

Energelia

<http://energelia.com/empresas-renovables>

Directory of companies dedicated to renewable energy.

Energética

<https://guia.energetica21.com/>

Digital magazine including a broad directory of organisations and companies in the field of renewable energy.

Fundació fòrum ambiental

<http://www.forumambiental.org/organitzacions/>

List of organisations, resources, institutions and services related to this sector.

Gremi de recuperació de Catalunya

<https://gremirecuperacio.org/servicios/empresas-agremiadas/>

This union provides specific training for professionals in this sector, offers all current legal information and answers the questions of the 250 member companies listed on their website, dedicated to waste treatment, recovery of materials and production of secondary raw materials that they supply to industries to create new objects or materials.

Industriambiente

<https://www.industriambiente.com/empresas>

Website compiling the current affairs on the environmental sector: news about products related to the environment, waste treatment, and renewable energy, amongst others. There is also a calendar of events, a search engine of specialised magazines, and a list of relevant courses and training for the different professional profiles in this sector.

Instituto para la Diversificación y Ahorro de Energía - IDAE

<https://www.idae.es/companies/energetic-services>

The Spanish Government's Institute for the Diversification and Saving of Energy (IDAE) is the public business organisation affiliated to the Spanish Ministry for the Ecological Transition through the State Secretariat for Energy. Their website offers a search engine listing all companies of energy services filtered by autonomous community or province.

DID YOU KNOW THAT...

Colleges and professional associations are organisations that **defend and promote the interests of a certain occupation or trade**. Most common services offered include: information, regulatory and legal advising, refresher courses and career site, where you may find suitable offers for your profile. Besides, by joining these organisations you will easily meet other professionals and **expand your contact network**.

REMEMBER!

To properly take advantage of the occupational opportunities brought by the **ecological transition**, you may find it useful to take up **specific trainings** on energy saving or the installation and maintenance of renewable energy facilities.

FOCUSING

The **renewable energy market** in Spain is growing considerably. Particularly, the **wind, photovoltaic and biofuel** industries are the ones with **more new job opportunities**.

04. Professional associations and leading training centres

A) COLLEGES AND PROFESSIONAL ASSOCIATIONS

Agència Catalana de l'Aigua - ACA

<http://aca.gencat.cat/ca/laca/organitzacio/treballa-amb-nosaltres/>

Company belonging to the Generalitat of Catalonia in charge of planning and managing the water cycle. They work to guarantee a sustainable use of water resources. Their website displays a list of offers for candidates to self-apply as well as a career site through which candidates may send their CVs.

Asociación Empresarial Eólica - AEE

<https://www.aeeolica.org/sobre-aee/portal-de-empleo>

Association leading projects that promote the development of wind energy. They also provide updated information about legal regulations, graphics and infographics, as well as a calendar of events and training courses, with the aim to foster communication and representation of companies in this sector. Besides, they publish job offers from their 225 member companies throughout Spain.

Asociación Española de Empresas del Sector del Agua - AQUA España

<https://aquaespana.org/>

Association working towards technical and financial development of the water sector while promoting good professional practice in the integral water cycle.

Associació de Químics i Enginyers de l'Institut Químic de Sarrià - AIQS

<http://www.aiqs.es/aiqspublic/>

AIQS offers several services, such as a career site and a training catalogue.

Catalunya Circular: l'Observatori d'Economia Circular

http://mediambient.gencat.cat/ca/05_ambits_dactuacio/empresa_i_produccio_sostenible/economia_verda/catalunya_circular

Innovation hub and meeting point for companies and institutions bringing solutions and strategies to consolidate circular economy in Catalonia.

Club Español de la Energía

<https://www.enerclub.es/>

Meeting point promoting the debate and exchange of experiences related to producing, transforming, transporting, storing, distributing and using energy. Their website displays an activity calendar, a wide training catalogue including graduate degrees and continuous learning programmes, a documentation centre with several information sources, a news section, and a career site for members.

Col·legi d'Ambientòlegs de Catalunya - COAMB

<https://www.coamb.cat/ocupacio/borsa-de-treball/>

COAMB represents environmental scientists as well as students and other professionals in the environmental field. There is a career site on their website.

Col·legi de Biòlegs de Catalunya - CBC

<https://cbiologs.cat/>

Meeting point for biology professionals. They offer training programmes, advising and other specific services such as a career site exclusively for members as well as resources related to employment and entrepreneurship in this sector.

Col·legi d'Enginyers Industrials de Catalunya - EIC

<https://www.eic.cat/>

Association offering services for the professional development of engineers in matters of training, employment, certification and advising, amongst others. Regarding employment, they have a career site, an advice service and even a coaching service available to members.

Col·legi Oficial de Químics de Catalunya - CQC

<http://www.quimics.cat/>

This association offers an extensive career site as well as training programmes, labour consultancy and a forum where members can exchange their professional experiences, amongst other services.

Ecoembes

<https://www.ecoembes.com/es/ciudadanos/sobre-nosotros/sobre-ecoembes/trabaja-con-nosotros>

Non-profit organisation dedicated to collecting containers throughout Spain and recycling them. Ecoembes provides information regarding the recycling process and how to give a second life to containers. They also develop training programmes and resources as well as communication campaigns aimed at companies and citizens. Besides, they have a career site and a form through which candidates may self-apply.

Ellen MacArthur Foundation

<https://www.ellenmacarthurfoundation.org/>

International foundation aiming to speed up the transition towards circular economy. They work with companies, institutions, governments and cities, providing the necessary conditions and bringing case studies as real examples. They produce reports about the benefits of circular economy, present case studies, develop training programmes and have a career site.

Federació de Gremis d'Instal·ladors de Catalunya - FEGiCAT

<https://www.fegicat.com/web/inicio/>

Group of associations and installation companies of Catalonia.

Fundación Economía Circular - FEC

<https://economiecircular.org/>

Foundation made up by acclaimed experts in circular economy, sustainability, use of resources and the environment. They promote projects related to circular economy, offer consulting services, lead a training programme called “Educacircular” and organise congresses and events. They communicate the latest news on the sector through their social media, blog and press room.

Gremi d'Àrids de Catalunya

<https://www.gremiarids.com/index.php>

It employs Catalan companies engaged in the extraction and treatment of sands.

Gremi d'instal·ladors de Barcelona

<https://www.gremibcn.cat/ca/>

Association of professionals in the installation of electricity, heating, air conditioning, plumbing, renewable energies, energy efficiency and telecommunications. Own training school, which provides professional certificates and a Higher Degree Training course in Energy Efficiency.

Institut Català d'Energia - ICAEN

<http://icaen.gencat.cat/ca/inici/>

Official website of the Catalan Energy Institute. They develop and carry out energy policies in Catalonia.

Institut Català d'Investigació Química - ICIQ

<https://www.iciq.org/jobs-grants/>

ICIQ conducts research mainly in the fields of catalysis and renewable energy. They publish research offers on their website, both pre- and postdoctoral, as well as technical support vacancies.

Institut Català de Recerca de l'Aigua - ICRA

<https://www.icra.cat/ofertes>

The Catalan Institute for Water Research Foundation (ICRA) conducts research promoting the integral water cycle in matters of water resource, water quality (chemical, microbiological, ecological, etc.) and treatment and evaluation technologies. They have a job offer section as well as a compilation of news and activities related to water.

Societat Catalana d'Educació Ambiental - SCEA

<https://scea.cat/>

The Catalan Society of Environmental Education promotes collaborative, interdisciplinary projects throughout Catalonia. They bring together professionals and citizens with the common goal to work towards sustainability from education. They offer a compilation of educational resources and kits focused on specific topics, as well as a news section.

Societat Catalana de Química - SCQ

<https://blogs.iec.cat/scq/>

The Catalan Society of Chemistry brings together chemistry professionals. This association is mainly focused on developing educational and scientific activities. They offer teaching resources as well as publications informing about the activities they organise - such as conference cycles, exhibitions, debates and meetings - as well as awards and grants that reinforce their outreach tasks on scientific research.

B) UNIVERSITIES AND SCHOOLS

Centre de Recerca Ecològica i Aplicacions Forestals – CREAF

www.creaf.cat

Public research centre focused on terrestrial ecology, territorial analysis and climate change.

Faculty of Chemistry of the Rovira i Virgili University

<https://www.fq.urv.cat/ca/empreses-institucions/borsa-treball/>

They offer job vacancies, internships and job placement grants to their students and alumni.

Fundació UAB

<https://www.uab.cat/fundaciouab/>

This entity, linked to the Universitat Autònoma de Barcelona, has a training catalogue in the field of Green and Circular Economy.

Institut de Ciència i Tecnologia Ambientals - ICTA-UAB

<https://www.uab.cat/web/el-centre-icta-uab-1345813120294.html>

Multidisciplinary research centre, postgraduate training and doctoral programmes in the field of Green and Circular Economy.

Institut de Recerca en Energia de Catalunya – IREC

<https://www.irec.cat/>

Research institute focused on the development of sustainable and disruptive energy solutions in the fields of energy and environment, intelligent energy management and energy storage.

Institute of Environmental Assessment and Water Research - IDAEA

<https://www.idaea.csic.es/>

The Institute of Environmental Assessment and Water Research (IDAEA) is an environmental science institute in the Spanish National Research Council (CSIC) devoted to studying the human footprint on the biosphere. The institute offers a list of job vacancies as well as a welcome plan, a section encouraging candidates to join the research centre, as well as a news and events service.

Instituto Superior del Medio Ambiente - ISM

<https://www.ismedioambiente.com/programas-formativos/economia-circular/>

Leading training centre in Spain offering online and in-person training related to circular economy. It is located in Madrid.

Leitat

<https://www.leitat.org/>

Technological and research centre dedicated to the transfer of knowledge in the fields of biotechnology, health, advanced materials, industrial chemistry, renewable energies and new production processes.

Parc Científic de Barcelona

<https://www.pcb.ub.edu/>

Leading ecosystem in research, technological transfer and innovation, mainly in the public sector. It was founded by the University of Barcelona.

Universitat Autònoma de Barcelona – UAB

<https://www.uab.cat/web/estudiar/grau/oferta-de-graus/tots-els-graus-1345661751752.html>

You will find master's degrees and programmes in the field of Green and Circular Economy at the Faculty of Biosciences, the Faculty of Sciences and the Faculty of Earth Sciences.

Universitat de Barcelona – UB

https://www.ub.edu/dyn/cms/continguts_ca/estudis/oferta_formativa/graus/

The UB offers undergraduate, postgraduate and master's degree training in the field of Green and Circular Economy at the Faculty of Biology, the Faculty of Physics, the Faculty of Chemistry and the Faculty of Geography and History.

Universitat Politècnica de Catalunya - UPC

<https://www.upc.edu/ca/masters>

The UPC offers degrees and master's programmes in the field of Green and Circular Economy in several of its centres around the region, such as the Escola Politècnica Superior d'Enginyeria de Manresa (EPSEM), the Escola Tècnica Superior d'Arquitectura del Vallès (ETSAV) and the Campus Nord, in Barcelona.

DID YOU KNOW THAT...

Networking, either online or in person, allows you to access to certain **offers that are not published in usual sites**, as well as widen your **contact network**. To network successfully, focus on the relationship as **an exchange** through which useful information is shared and received. So: make yourself visible, interact and share! In exchange, you will receive opportunities, proposals and recommendations that will boost your job search.

REMEMBER!

This sector particularly values **hybrid professionals**: those who, besides being knowledgeable in the matter, have an experience in other related areas such as **construction** and **industry 4.0**. This promotes occupational mobility.

FOCUSING

Energy generation is currently evolving towards a **distributed model** characterised by local energy production promoting the use of **renewable energy**, which contributes to **decreasing the dependence** on major marketers.

05. Networking

A) ORGANISATIONS

Barcelona + sostenible

<https://www.barcelona.cat/barcelonasostenible/ca>

Barcelona + sostenible is a public initiative of the Barcelona City Council within the framework of Citizen Commitment to Sustainability. Their website displays a calendar of events related to environmental protection as well as networking events.

Catalan Water Partnership - CWP

<http://www.cwp.cat/>

Partnership formed by companies and knowledge centres operating in the sector of sustainable water use.

Centro Nacional de Educación Ambiental - CENEAM

<https://www.miteco.gob.es/es/ceneam/grupos-de-trabajo-y-seminarios/default.aspx>

This site within the website of the National Centre for Environmental Education (CENAM) gives access to the state programme of work groups and symposiums, which promote meeting points for professionals in this sector. They also have other services, such as themed mini-portals and environmental training programmes.

Cercle Tecnològic de Catalunya - CTecno

<https://www.ctecno.cat/lobbynetworking/>

Private non-profit foundation focused on networking in the technological field. They organise conferences, debates and activities combining ICT, circular economy and sustainability.

Clúster Bioenergia Catalunya - CBC

<https://www.clusterbioenergia.cat/ca/>

It represents the professional bioenergy sector and aims to promote the sustainable use of biomass in Catalonia.

Clúster de l'Energia Eficient de Catalunya - CEEC

<https://www.clusterenergia.cat/>

Integrated by organisations that offer, promote or develop products or services related to energy efficiency.

Clúster d'Energia Solar – Solartys

<https://www.solartys.org/es/>

Association of installation, engineering, manufacturing and distribution companies of solar energy materials and components, that seeks to promote the energy transition.

Comunidad ISM

<http://www.comunidadism.es/>

This website shares information for professionals in the environmental field. It is promoted by the Higher Institute of the Environment (Madrid).

Life MIDMACC

<https://life-midmacc.eu/ca/networking/>

Organisation dedicated to overcoming challenges related to climate change in marginal mid-mountain areas of Spain (La Rioja, Aragón and Catalonia). They offer a wide range of networking activities and several projects.

Obrador del tercer sector ambiental de Catalunya - o3sac

<https://bcnsostenible.cat/web/punt/obrador-del-tercer-sector-ambiental-de-catalunya-o3sac>

This bureau gathers organisations of the environmental third sector with an obvious social and collective interest. They work towards promoting the creation of environmental associations, consolidating environmental organisations and raising awareness of their importance amongst the Catalan society. Their main field of work is related to favouring networking and alliances of the organisations.

Tàndem.cat

<https://tandem.cat/>

Tàndem is a project promoting and evolving cooperation between companies and non-profit organisations to develop innovative environmental projects. The “Marketplace” section on their website displays several events for the general public.

B) DIGITAL RESOURCES

Caixa d'enginyers

<https://blog.caixa-enginyers.com/categoria/social/>

This website features articles and reflections about sustainable development.

Eco circular

<https://eco-circular.com/>

Magazine specialised in this sector.

Sostenible.cat

<https://www.sostenible.cat/>

Magazine of the Network of Cities and Towns for Sustainability, promoted by the Barcelona Provincial Council.

Urbanresiduos

<https://urbanresiduos.com/>

Magazine specialised in this sector.

DID YOU KNOW THAT...

Attending conferences and events is a **source of knowledge and interest** for any professional. Firstly, conferences and talks available usually shed light on **new trends** in the sector. Secondly, networking areas that are available in these type of events promote **new collaborations and professional opportunities**. All in all, they are a good way to keep yourself up to date and contact companies in your sector.

REMEMBER!

Smart City Expo World Congress is an **international meeting point** where attendants share information and learn about the best projects focused on developing **smart cities**. Amongst others, they provide an award in circular economy.

FOCUSING

The introduction of **robotics in waste management and treatment** has reduced the amount of waste sent to landfills. After a sterilisation process, there has been an **increase in the recovery of plastic**.

06. Conferences and events

Circular Economy Hotspot Catalonia

<http://www.cehotspot.cat/en/home>

Circular economy event gathering international business representatives and public. The aim is to share the latest successful business initiatives, R&D&I projects, as well as government strategies and collaborations in this field.

Congrés de l'Aigua de Catalunya

<https://congressaiguacatalunya.com/>

This event aims to share and discuss the planning and management of water resources and climate change in Catalonia.

Congrés d'Energia de Catalunya

<http://congresenercat.blogspot.com/>

Website of the Energy Congress of Catalonia. The congress aims to discuss the Catalan energy system and its energy transition.

Congreso de Economía Circular i Comunicació Ambiental - ECCA

<https://ecca-economiacircular.com/>

ECCA is the first congress in Spain dedicated to circular economy and environmental communication, where leading business and government representatives develop circular ideas and get in touch with all the actors involved in this sector.

Dia Mundial del Medi Ambient a Barcelona

http://mediambient.gencat.cat/ca/05_ambits_dactuacio/educacio_i_sostenibilitat/dia-mundial-medi-ambient/index.html

Every June 5th, Barcelona celebrates the World Environment day by organising several activities, workshops and events.

Exposició i Fòrum de les Empreses Instal·ladores i Noves Tecnologies – EFINTEC

<https://www.efintec.es>

Fair that hosts manufacturers and distributors of electricity, air conditioning, water, refrigeration, telecommunications, renewable energy, IOT, thermal, automation, energy or related.

Feria de la Digitalización y Descarbonización del Agua - EFIAQUA

<http://efiaqua.feriavalencia.com/>

International fair held in Valencia dedicated to water management efficiency. There are representatives of both public and private sectors for which water is a strategic resource.

Smart City Expo World Congress

<https://www.smartcityexpo.com/>

Held in Barcelona, the Smart City Expo World Congress is the leading international show and congress on Smart Cities.
